Mike -

I think it would be useful for you and Karen, probably with staff, to discuss this and come up with a common position on both P+N and alternatives. It will get thorny very quickly.

I did sit in on the collective meeting with DWR and Marc Ebbin on the P+N, and have raised a number of my own questions. I can fill you in on all of that.

But I am actually not a 404 guy, but we're bringing in Erin, who has done it for a while, and Karen may augment that. But that's up to her to discuss with you.

Tom:

Not sure where EPA stands but we have some issues with the purpose statement as proposed. Mike Nepstad and Lisa Clay have been working it (probably with you). We'd like to have a NEPA purpose statement that works for 404 purposes too.

MJ

Tom - I just spoke generally with Mike Jewell regarding purpose and need, coordination, etc. with a view to trying to assure that the BDCP documents, especially the EIR/S are consistent with and meet COE requirements. It would be a good idea to get the right people together for a meeting to move forward on this. I intend to raise it and see if we can put such a meeting together as part of the agenda for Tuesday's BDCP coordination meeting.

David
